  Ben (Both)

  Andrew

  Julie

  Ryan(Both)

Branch	Commit message	Time
master	Merge branch 'master' of https://github.com/B-Rad80/code-components	1 hour ago
	fixing bugs	
	Milestone 7	12 hours ago
hosted h	Updated about.html	6 days ago
	fix Julie's getInHub_test.py merge conflicts	
	adding geojson files	
	Login/Logout Funtionality	
	minor edits to html/css	
	Merge branch 'master' of https://github.com/B-Rad80/code-components	
	Merging!	
	Create LICENSE	
	didnt actually change anything	
	implemented everything from master branch into this one	
	switching to hosted branch - requires commit because yeah	
	Website navigation complete	
	travis v5	
	travis v4	
	travis v2	
	travis v2	
	doing travis stuff	
	forgot to update requirements.txt	
	fixed details	
	fixed merge?	
	these changes will make hosted run locally again	
	Homepage and others added, adding navbar into this branch	
	Added Error Handling	a week ago
	forgot to add import os	
	adding compabtibility with pyscob (postgres non-django form) (thx ryan)	
	trying to add db	
	fixed merge errors wsgi.py	
	running in circles	
	moved procfile to same dir as manage.py with 'mysite' as name	
	cant even remember if i changed anything	
	fixed the req over write	
	i hate this	
	moved stuff back??	
	moved stuff around	
	copied manage.py	
	changed WSGI.py	
	changed procfile	
	changed procfile	
	first commit	
FileDump	working mass drop wooot	
	Improved multiple-address handling	
	Couple small changes	
	Added massResponse and functionality to take multiple address inputs	
Andrews_Desi... +2	The real push of all of the progress because I'm dumb apparently	2 weeks ago
	Add files via upload	3 weeks ago
	push of all progress before meeting on 11/7	
	edited the html for the upload page in hubquery. added an upload file instead of enter an address. non-operational.	
merge_master	Merge pull request #4 from B-Rad80/merge_dtest	a month ago
merge_dtest	Merge remote-tracking branch 'origin/merge_master' into merge_dtest	
	Merge pull request #3 from B-Rad80/Django_Working	
Django_Working	Readme	
v1.0	Merge pull request #2 from B-Rad80/Django_Working	
	Added gitignore	
	Updated README	
	Updated README	
	Updated Requirements	
	More README changes	
	Changes to README	
	Changes to README	
	Added website functionality and designation databases.	
Django_Test h	I've cleaned up the URLS.py of Mysite and it now redirects and prints the address entered at /address/	
	fixing file upload issues	
	actual reqs	
	attempt3	
	Add files via upload	
	Create README.md	

- Deployment: hubzone-v1.herokuapp.com
